

## Text Processing Worksheet

1. Determine whether the following methods return true or false
  - a. `isdigit('a')`
  - b. `isalpha('b')`
  - c. `isalnum('c')`
  - d. `islower('d')`
  - e. `isupper('e')`
  - f. `isspace('f')`
  - g. `isspace('\t')`
  - h. `isprint('\t')`
  
2. Use `cplusplus.com` to determine what the following functions return given that  
    `string str = "The Constitution of The United States";`  
    `string date = " 1787";`
  - a. `str.length( )`
  - b. `str.at(4)`
  - c. `str.find("The")`
  - d. `str.rfind("The")`
  - e. `str.substr(20)`
  - f. `str.append(date)`
  - g. `stod("7.6")`
  - h. `stoi("4");`
